

# Courts of the Future – The Future of Courts Between Automated Justice and Platform Jurisprudence

## Online Workshop Series

convened by **Wolfgang Schulz** • **Matthias C. Kettemann** • **Giovanni De Gregorio**

Technology creates societal fractures. Courts have been created to fill these fractures. But courts are uneasy platform rulers, especially as platforms seek to recreate private oversight entities. This workshop series takes a deep dive into the role of automated decision-making in and in front of courts, of platform courts and of the use of courts to effect social changes.

The four noon events featuring a keynote speaker and one or more discussants run from April to July 2021 and are organized by the Leibniz Institute for Media Research | Hans-Bredow-Institut (HBI) and its Private Ordering Observatory (PrObs), the Baffi Carefin Center at Bocconi University and the Humboldt Institute for Internet and Society (HIIG).
